

Documentation

INTELLECT Software Package 4.9.8

Administrator's Guide

This guide is designed for system administrators, installation and configuration specialists and users with rights of administration digital systems of video surveillance and audio control created on the basis of the Intellect software

Main topics:

Installing and removing INTELLECT™ software

Configuring the INTELLECT™ software system with distributed architecture of the digital video surveillance system

Configuring video subsystem

Configuring audio subsystem

Rights administration

Quick Start Guide

This guide is designed for quick introduction with the Intellect software package

Main topics:

Starting and closing the Intellect software

Configuring the Intellect software package

Operating the Intellect software package

Operator's Guide

This guide is designed for Operators working with the Intellect software package

Main topics:

Video surveillance

Audio Surveillance

Archives of video and audio recordings

Events control and processing

Working with the map

Installing and configuring security system components guide

This guide contains the information about installing and configuring components of security system for operating with the Intellect software package

Main topics:

Assembly and installation of video surveillance subsystem hardware

Connecting DI/DO cards

Configuring video capture cards in INTELLECT™ software

Configuring DI/DO devices in INTELLECT™ software

Telemetry configuration

Programming Guide (JScript)

This manual contains the information needed for writing scripts on the JScript programming language in the Intellect software package

Main topics:

Description of the JScript object model in Intellect

Programming tools

Creating your first script

Intercom Subsystem Reference and Information Guide

The *Intercom Subsystem Reference and Information Guide* is a reference manual designed for Intercom Subsystem configuration technicians and operators. This subsystem built on the basis of the *Intellect* Software System.

Main topics:

Configuration of the Intercom subsystem

Working with the Intercom Subsystem

Hardware and Software Module Integration Guide

This manual contains the information needed when integrating functional modules that provide adding new security hardware to the system and implementing new service functions (security hardware management).

Main topics:

Integrating hardware and software modules with Intellect

Intellect Integration Developer Kit (IIDK)
