New features and improvements

Ref No.	Description
POS-838	Now compatible with Intellect 4.9.0.
POS-902	The MixForward utility can accept packets from multicast captions.
POS-928	Events from payment terminals can be ignored for events with a null-value parameter. This functionality works when the XML protocol is used; the necessary parameter must be indicated in the [IGNORE_ZERO] section of the file xml_titles.txt.
POS-925	Support for the modernized G2 protocol (Cash) has been integrated. New KKM plug-in for the MixForward utility has been added.
POS-917 POS-916 POS-910	New payment equipment has been integrated. New PicknPay plug-in for the MixForward utility has been added.
POS-906	New payment equipment has been integrated. New types of POS terminals have been added: D-Store and POS debug.

Fixed bugs

Ref No.	Description
---------	-------------

POS-950	Fixed error related to incorrect sorting of POS terminals in settings for Store objects.
POS-948	Fixed error related to incorrect sorting of servers in settings for POS Replicator objects.
POS-899	Fixed error related to frequent display of repeating messages in POS replicator logs.
POS-898	Fixed error during replication of large receipt databases.
POS-897	Fixed error: incorrect data is no longer displayed when two different xml_titles parsers are used simultaneously.
POS-895	Fixed error of data writing to the POS_LOG_DETAIL table of the receipts database
POS-883 POS-879 POS-878	Fixed error related to incorrect functioning of the Receipt Archive Size setting for POS Terminal objects
POS-841	Fixed error impacting use of the readerserv.exe utility on Windows 7.

A number of minor bugs have been fixed and product stability has been improved.

Documentation and Localization

In *POS-Intellect* 5.0 documentation and localization have been updated.
